CLEAN-GEARTECH

HYGIENIC DESIGN GEARBOXES

MAIN FEATURES

- High pressure clean up
- Pooling free mounting
- Sealed holes
- Sealed oil plugs
- Simple washing
- Smooth surfaces
- No plastic plugs

SECTORS OF USE

- Meat&Poultry
- Beverage
- Fruits & Vegetables
- Animal food
- Seafood / Fish farming
- Bakery
- Confectionery
- Cleaning systems
- Conveyors
- Dairy
- Food packaging
- Food processing
- Freezing Systems
- Mixers Agitators
- Pumps
- Ventilators
- Chemical
- Cosmetics
- Pharmaceutical
- Marine and fishing

The CLEAN-GEARTECH philosophy

Protection level ↑

BEST

AISI 316L
AISI 304

Full stainless steel, the best for every application.

Completamente in acciaio inox, la miglior soluzione per qualsiasi applicazione.

Smooth surface aluminum worm gearboxes with additional white protective paint.

Riduttori a vite senza fine in alluminio a superficie liscia con ulteriore vernice protettiva bianca.

The starting base for avoiding dust accumulation.

Design adatto a consentire la miglior pulizia del prodotto. La base di partenza per evitare l'accumulo di polvere.

Hygienic stainless steel 316L electric motors

Motori elettrici igienici in acciaio inox 316L

The VFD Series Smooth surface aluminum worm gearboxes

On request

On request

The VFD - STANDARD Series

It is our most economical basic solution to reduce dust accumulation. Also available with aluminum electric motor APM series without ribs.

La serie VFD - STANDARD

E' la soluzione più economica per ridurre l'accumulo di polvere. Disponibile anche con motore in alluminio senza alette, serie APM.

The VFD - NTT Series

Gearbox with a protective coating to reduce dust accumulation and for water washing. Also available with aluminum electric motor APM series without ribs with protective coating.

La serie VFD - NTT

Riduttore con rivestimento protettivo per ridurre l'accumulo di polvere e per lavaggio con acqua. Disponibile anche con motore in alluminio senza alette con rivestimento protettivo, serie APM.

The VFD - PAINTED Series

It is also available with protective white paint, providing a good level of protection in medium aggressive environments. See the graph in the next page.

La serie VFD - PAINTED

E' disponibile anche con vernice protettiva bianca che permette un livello di protezione medio per ambienti aggressivi. Vedere il grafico nella prossima pagina.

THE BASIC PROTECTION

Vacuum impregnated housing

Single piece aluminum alloy housing vacuum impregnated MIL-STD 276.

Design adatto a consentire la miglior pulizia del prodotto. Cassa monoblocco impregnata sotto vuoto MIL-STD 276.

Hardened and ground worm

Hardened and ground worm, teeth radiused for noise reduction.

La vite senza fine è temprata ed i denti sono profilati e raggiati per ridurre il rumore.

Options Coupling

Premium input coupling:

- Direct mounting
- No settings
- No screw

Giunto in entrata:

Montaggio diretto - No settaggi - No viti.

Output hollow shaft

Cast iron hollow shaft. CuSn12Ni (C91700) Nickel bronze worm gear for superior life.

Mozzo in ghisa. Corona in bronzo al Nickel CuSn12Ni (C91700) centrifugato per massima resistenza e durata superiore.

Options Stainless steel hollow shaft in AISI 316L

Mozzo in uscita in AISI 316L.

Hardware

Output male shaft in carbon steel. Zinc plated: feet screws and reaction arms.

Albero maschio in uscita removibile in acciaio.

Piedi, viteria e bracci di reazione zincati.

Options Stainless steel hardware

Stainless steel output male shaft, protection cap, feet, screws and reaction arms.

Albero maschio in uscita removibile, coperchietto di protezione, piedi, viteria e bracci di reazione in AISI 316L.

NBR seals

NBR seals on hollow output shaft.

Anelli di tenuta in NBR su mozzo in uscita.

Options Viton seals

Single viton seal for harsh environment.

Anelli di tenuta in viton per ambienti aggressivi.

Twin viton seals with stainless steel 316L shield for IP69K protection.

Doppi anelli di tenuta in viton con schermo protettivo in acciaio inox AISI 316L per protezione IP69K.

On request White protective painting RAL 7035

The graph below shows the behavior of an aluminum gearbox (not painted) and of a gearbox with protective paint during the salt spray test. The time (hours spent in the test) is indicated on the horizontal axis, while the degree of corrosion on the surface of the reducer is indicated on the vertical axis. The curve of the aluminum reducer (not painted) shows that only after about 100 hours of testing the first signs of corrosion are formed (the curve enters the "corrosion starting" zone) and then spreads rapidly ("corrosion" zone). The curve of the reducer with protective coating instead shows that after 1200 hours of permanence in saline mist, there are still no signs of corrosion.

Il grafico seguente riporta il comportamento di un riduttore in alluminio (non verniciato) e di un riduttore con vernice bianca protettiva durante il test in nebbia salina. Sull'asse orizzontale è indicato il tempo (ore di permanenza nel test) mentre sull'asse verticale il grado di corrosione sulla superficie del riduttore. La curva del riduttore in alluminio (non verniciato) evidenzia come solo dopo circa 100 ore di test si formano già i primi segni di corrosione (la curva entra nella zona "corrosion starting") e poi si propaga rapidamente (zona "corrosion"). La curva del riduttore con verniciatura protettiva mostra invece come dopo 1200 ore di permanenza in nebbia salina, non vi siano ancora segni di corrosione.

NSS Neutral Salt Spray Test

Type DCTC 1200 P n° L79 SO 9227:2006 (E) with salt spray test: 5% NaCl

This graph is an indication, since some chemical components may be more aggressive than the salt spray test. Test are suggested on special cases (in case use type "N series", full stainless steel gearboxes).

Il grafico va considerato come indicativo perché altri agenti chimici potrebbero risultare più aggressivi del test in nebbia salina. Sugeriamo prove specifiche nell'ambiente di lavoro e nel caso non vengano soddisfatti i requisiti minimi si consiglia di utilizzare la gamma in acciaio inox "Serie N".

The VFN Series Stainless steel worm gearboxes

The VFN Series

It is the best solution for the resistance to corrosion.
Suitable for all applications.
Entirely in stainless steel with smooth surfaces for easy cleaning.
Also available with stainless steel motor SPM series.

La serie VFN

*E' la migliore soluzione per la resistenza alla corrosione.
Adatto a tutte le applicazioni.
Interamente in acciaio inox con superfici lisce per facilitare la pulizia.
Disponibile anche con motore in acciaio inox, serie SPM.*

The RCN Series

It is the best solution where hygiene and cleanliness are required.
The ratio multiplier gearbox has smooth surfaces for easy cleaning.
Also available with stainless steel motor SPM series.

La serie RCN

*E' la migliore soluzione dove è richiesta igiene e pulizia.
Il riduttore ad uno stadio ha superfici lisce per facilitare la pulizia.

Useful formulas

Formule utili

Required power - Potenza richiesta

Lifting - Sollevamento

Rotation - Rotazione

Linear movement - Traslazione

$$P_{[kW]} = \frac{M_{[Kg]} \cdot g_{[9.81]} \cdot v_{[m/s]}}{1000}$$

$$P_{[kW]} = \frac{M_{[Nm]} \cdot n_{[rpm]}}{9550}$$

$$P_{[kW]} = \frac{F_{[N]} \cdot v_{[m/s]}}{1000}$$

Torque - Coppia

$$M_{[Nm]} = \frac{9550 \cdot P_{[kW]}}{n_{[rpm]}}$$

$$M_{[lb\ in]} = \frac{63030 \cdot P_{[HP]}}{n_{[rpm]}}$$

Radial loads - Carichi radiali

Radial load generated by external transmissions keyed onto input and/or output shafts.

Forza radiale generata da organi di trasmissione calettati sugli alberi di ingresso e/o uscita.

$$F_R_{[N]} = \frac{M_{[Nm]} \cdot 2000}{d_{[mm]}} \cdot f_k$$

$$F_R_{[N]} = \frac{M_{[lb\ in]} \cdot 8.9}{d_{[in]}} \cdot f_k$$

M: Output torque - Momento torcente

d: Diam. of driving element - Diametro primitivo

f_k: Factor - Coefficiente di trasformazione

1.15: Gearwheels - Ingranaggi

1.25: Chain sprockets - Catena

1.75: Narrow v-belt pulley - Cinghia Trapezoidale

2.50: Flat-belt pulley - Cinghia piatta

If your application requires higher radial loads, contact our technical office. Higher loads may be possible.

Nel caso la vostra applicazione richieda carichi radiali superiori consultare il nostro ufficio tecnico, valori maggiori possono essere accettati.

1000 hours

Two-component polyurethane product formulated with unmodified hydroxylated acrylic resin, to be crosslinked exclusively with an aliphatic isocyanic catalyst which gives rise to more elastic and non-yellowing films. It can be applied in thick layers with limited solvent emission. This product guarantees excellent adhesion on steel, galvanized steel and other metals, excellent wetting of the substrate and high chemical resistance, hardness and flexibility. The presence of zinc phosphate allows a high protection against anodic dissolution and delay in the formation of rust. Show tolerance to non-optimal application and substrate conditions. It remains strongly recommended where you want to offer high level protection in various painting cycles a different degree of resistance. The primer also has, together with an excellent resistance to abrasion, a high adhesion.

Prodotto poliuretano bicomponente formulato con resina acrilica ossidrilata non modificata, da reticolare esclusivamente con catalizzatore isocianico alifatico che dà luogo a film più elastici e non ingiallenti. Può essere applicato ad alto spessore con contenuta emissione di solventi. Tale prodotto garantisce eccellente adesione su acciaio, acciaio zincato ed altri metalli, ottima bagnatura del substrato ed elevata resistenza chimica, durezza e flessibilità. La presenza di fosfato di zinco permette un' elevata protezione contro la dissoluzione anodica e ritardo nella formazione della ruggine. Mostra tolleranza a condizioni di applicazione e del supporto non ottimali. Resta decisamente raccomandato ove si desideri offrire protezione ad alto livello in vari cicli di verniciatura a diverso grado di resistenza. Il fondo possiede inoltre, unitamente ad un'ottima resistenza all'abrasione, una elevata adesione.

NSS Neutral Salt Spray Test

Type DCTC 1200 P n° L79 SO 9227:2006 (E) with salt spray test: 5% NaCl

This graph is an indication, since some chemical components may be more aggressive than the salt spray test. Test are suggested on special cases (in case use type "N series", full stainless steel gearboxes).

Il grafico va considerato come indicativo perchè altri agenti chimici potrebbero risultare più aggressivi del test in nebbia salina. Sugeriamo prove specifiche nell'ambiente di lavoro e nel caso non vengano soddisfatti i requisiti minimi si consiglia di utilizzare la gamma in acciaio inox "Serie N".

Suggestions on application of the gearboxes

Suggerimenti sull'applicazione dei riduttori

Close protection cap

Coperchio di protezione chiuso

Closed protection cap seals the output hollow shaft end and provides protection against the rotating shaft. The cover can be mounted on both sides of the housing, matching screws are included in the scope of delivery.

Il coperchio di protezione chiuso sigilla l'estremità dell'albero cavo di uscita e fornisce protezione contro l'albero rotante. Il coperchio può essere montato su entrambi i lati dell'alloggiamento, le viti corrispondenti sono incluse nella fornitura.

Continuous duty on bevel gear

Servizio continuo su coppie coniche

If the application requires a gearbox for continuous duty operation, then choose a torque rating that is higher than the expected application torque and **avoid if possible vertical positions**.

For more information, contact our technical service.

Se l'applicazione richiede un riduttore per servizio continuo, sceglierne un valore di coppia superiore alla coppia di applicazione prevista evitare se possibile posizioni verticali.

Per maggiori informazioni, contattare il nostro servizio tecnico.

Input speed

Velocità di ingresso

When choosing a gearbox for a specific application, consider that with the input speed exceeding 1800 rpm, the temperature can rise.

Quando si sceglie un riduttore per un'applicazione specifica, considerare la velocità di ingresso superiore ai 1800 giri/min la temperatura può salire.

Input coupling assembly *Montaggio Giunto in entrata*

PATENTED

The coupling is only suitable for the use of standard IEC / NEMA motors. The motor shaft must always have the shoulder to hold the coupling in position. The diameter of the coupling must always correspond to the IEC / NEMA flange applied to the reducer, reduced or increased dimensions of the hole are not allowed.

Il giunto è adatto solo per l'utilizzo di motori standard IEC / NEMA. L'albero motore deve avere sempre lo spallamento per tenere in posizione il giunto.

Il diametro del giunto deve sempre corrispondere alla flangia IEC / NEMA applicata al riduttore, non sono consentite dimensioni ridotte o maggiorate del foro.

Direct mounting - No settings - No screw

Montaggio diretto - No settaggi - No viti

1

Do not mount
oil seals on
motor flange
*Non montare anelli di
tenuta nella flangia motore*

The following WARNING and CAUTION information are supplied to you for the proper functioning of your product.

Read ALL instructions prior to operating reducer.

Injury to personnel or reducer failure may be caused by improper installation, maintenance or operation.

WARNING:

- Written authorization is required to operate or use reducers in man lift or people moving devices.
 - Check to make sure that certain applications do not exceed the allowable load capacities published in the current catalog.
 - Buyer shall be solely responsible for determining the adequacy of the product for any and all uses to which Buyer shall apply the product. The application by Buyer shall not be subject to any implied warranty of fitness for a particular purpose.
 - For safety, Buyer or User should provide protective guards over all shaft extensions and any moving apparatus mounted thereon. The User is responsible for checking all applicable safety codes in his area and providing suitable guards. Failure to do so may result in bodily injury and/or damage to equipment.
 - Gearboxes operating in high position should have a protective shield for any possible parts falling down for casual accidents where people are moving under them.
 - Hot oil and reducers can cause severe burns. Use extreme care when removing lubrication plugs and vents.
 - Make certain that the power supply is disconnected before attempting to service or remove any components. Lock out the power supply and tag it to prevent unexpected application power.
 - Reducers are not to be considered fail safe or self-locking devices. If these features are required, a properly sized, independent holding device should be utilized.
- Reducers should not be used as a brake.
- Any brakes that are used in conjunction with a reducer must be sized or positioned in such a way so as to not subject the reducer to loads beyond the catalog rating.
 - Lifting supports including eyebolts are to be used for vertically lifting the gearbox only and not other associated attachments or motors.
 - Use of an oil with an EP additive on units with backstops may prevent proper operation of the backstop. Injury to personnel, damage to the reducer or other equipment may result.
 - Overhung loads subject shaft bearings and shafts to stress which may cause premature bearing failure and or shaft breakage from bending fatigue, it not sized properly.

SELLING CONDITIONS

Warranty for manufacturing defects will expire one-year after the invoicing date. Cleangeartech will replace or repair defective parts but will not accept any further changes for direct or indirect damages of any kind. The warranty will become null and void if repairs or changes are carried out without our prior written authorization.

Our company will not be responsible for any direct or indirect damages, caused by a wrong use of the products or for not observing the catalogue/web indication.

If the process requires total protections the customers should consider additional measures to avoid any contaminations arising from the gearboxes.

CLEAN-GEARTECH È UNA DIVISIONE DI HYDRO-MEC SPA PER QUESTO MOTIVO HYDROMECS SPA È LEGALMENTE IL RESPONSABILE DEI PROBLEMI DI GARANZIA.

LEGGERE ATTENTAMENTE

Le seguenti raccomandazioni sono fondamentali per un buon funzionamento del vostro prodotto.

Leggere attentamente tutte le istruzioni prima di azionare il riduttore.

L'inappropriata installazione, manutenzione o funzionamento del riduttore può causare incidenti al personale addetto edanni al riduttore stesso.

ATTENZIONE:

- E' richiesta autorizzazione scritta per azionare riduttori in ascensori o dispositivi per il movimento delle persone.
- Controllare che alcune applicazioni non eccedano la massima capacità di carico ammessa pubblicata in questo catalogo.
- L'acquirente è l'unico responsabile per la determinazione dell'adeguatezza del prodotto per qualcuna o tutte le utilizzazioni che l'acquirente stesso farà del riduttore. L'applicazione dell'acquirente non potrà essere soggetta ad alcuna implicita garanzia di montaggio per uno scopo particolare.
- Per ragioni di sicurezza l'acquirente dovrà provvedere a porre protezioni adeguate su tutta la lunghezza dell'albero a tutti gli organi in movimento. L'utilizzatore è responsabile del controllo di tutti i codici di sicurezza e la predisposizione di protezioni adeguate. In assenza di tali precauzioni si possono verificare incidenti alle persone e danni agli apparati.
- Su riduttori installati in posizioni elevate utilizzare protezioni adeguate per qualsiasi distacco accidentale di parti nel caso di passaggio di persone al di sotto.
- Olio e riduttori bollenti possono causare gravi ustioni. Usare estrema cautela nella rimozione dei tappi e delle ventole.
- Assicurarsi che la corrente di alimentazione sia scollegata prima di riparare o rimuovere alcun componente. Chiudere l'alimentazione e contrassegnare tale operazione per evitare accensioni accidentali.
- I riduttori non devono essere considerati esenti da guasti o a bloccaggio automatico. Se sono indispensabili queste caratteristiche, deve essere utilizzato un dispositivo indipendente della dimensione adatta. I riduttori non devono essere utilizzati come freni.
- Qualsiasi freno sia utilizzato insieme al riduttore deve essere della giusta grandezza e posizionato in modo da non causare carichi eccessivi non previsti dai dati forniti nel catalogo.
- I dispositivi di sollevamento come le golfare devono essere usati solo per sollevare verticalmente il riduttore e non altri dispositivi associati o motori.
- L'utilizzo di un olio con un additivo EP su gruppi provvisti di dispositivo di arresto possono inficiare l'uso corretto del freno e provocare danni alle persone, alle cose ed al riduttore stesso nonché ad altri apparecchi.
- I Carichi sospesi assoggettano i cuscinetti della vite e la vite stessa a sollecitazioni che possono causare, se non adeguatamente dimensionati, l'usura prematura dei cuscinetti e/o l'arrotatura della vite a causa della resistenza alla flessione.

CONDIZIONI DI VENDITA

La garanzia relativa a difetti di costruzione ha la durata di un anno dalla data di fatturazione della merce. Tale garanzia comporta per Cleangeartech l'onere della sostituzione o riparazione delle parti difettose ma non ammette ulteriori addebiti per eventuali danni diretti o indiretti di qualsiasi natura. La garanzia decade nel caso in cui siano state eseguite riparazioni o apportate modifiche senza nostro consenso scritto.

La nostra ditta non si ritiene responsabile per eventuali danni diretti o indiretti derivanti da un uso improprio dei prodotti e dalla mancata osservanza delle indicazioni riportate a catalogo o web.

Se il processo richiede una protezione totale, i clienti dovrebbero prendere in considerazione misure aggiuntive per evitare qualsiasi contaminazione derivante dai riduttori.

International General sales and warranty conditions

Quotations:

Unless differently agreed, the validity of all quotations is 2 months. The quotations are provided according the RFQ (request for quotation) which shall contain the complete and detailed specification of the Product, the correctness of which is fully under responsibility of RFQ applicant.

Orders:

Only official orders issued on the Customer's letter-head are accepted. The Order Confirmation (OC) is issued within few days from the order receipt unless the Products configuration issues arise. The OC shall be confirmed in writing within few working days from the OC date and in all its parts – the product code and description, quantities and price, other specific information, if any. The OC is considered confirmed by tacit approval in case no written confirmation is provided by the Customer within 7 days.

Production time:

The average production time for the standard Products is normally 3-4 weeks from the OC confirmation date and/or payment receipt in case of advanced payment term. For some configurations of the standard Products the production time can be longer and shall be advised in the quotation and/or in any case in OC. In the period of Christmas holidays and August holidays the days of company closure are excluded from the abovementioned production term. Possible delays due to production picks, do not give the buyer a right to require any kind of penalty or indemnity.

Delivery terms:

FCA Sovizzo, Italy (Incoterms 2016).

Packaging:

The products are packed in wooden boxes as a standard packaging. Europallets can be also used on request. The prices and details of the packaging are indicated in the specific section of the Price List.

Payment terms:

The payment should be performed in terms indicated in the invoice and by wire transfer.

Prices:

The prices are indicated in the invoice and intended ex-works, unless differently specified, and do not include any kind of taxes, shipment or other type of costs.

Standard Products orders cancellation:

Modification or cancellation of the orders is accepted only if notified to the Manufacturer in writing and not later than 5 days from the Order Confirmation and in any case before the production of the ordered Products is launched.

Special execution of customized products:

The Products that are not included in the catalogue or configurations of the products that can not be realized using catalogue, options and accessories brochure and/or online configurator are considered Customized Products.

- (a) The Manufacturer is entitled to examine feasibility of Special Execution of Customized Products and define the minimum quantity, production time and eventually other special sales and production conditions issuing thereafter a Special Execution Quotation that shall be confirmed by the Customer in writing.
- (b) Once the Quotation is confirmed, The Manufacturer shall realize a Special Execution (SE) data sheet with its unique code for each Customized product. The SE data sheet shall be confirmed in full and in writing by the Customer.

(c) The production time of SE is definitely settled by The Manufacturer and notified to the Customer after the SE data sheet confirmation. As a rule, the production time for SE of Customized products is longer than standard.

(d) The orders of Special Execution of Customized products cannot be cancelled unless special written agreement is made before the production of SE is launched.

WARRANTY Conditions:

(a) Warranty period is 12 months from the shipment date.

(b) Warranty period could be extended to 18 months prior written agreement of the parties and in any case excluding wearable parts.

(c) Warranty covers only manufacturing defects. Wearable parts (for example, oil seals or lubricants leakages caused by normal wear) and failures due to the wrong assembling by the Customer are not covered by warranty.

(d) This warranty is also void in any case in which the products have been misused, used in improper environment conditions, configured beyond design limits indicated in the catalogue (especially service factor, loads and type of motors) or damaged, even accidentally or whenever installation instructions have not been strictly followed and in case of any natural disasters, in case of negligence of the Customer and the end user.

(e) The Customer is fully responsible to assure the compatibility of applications and correct mechanical couplings and electrical connections with the specifications of the Products according to The Manufacturer catalogues and technical documentation

(f) The liability of The Manufacturer is strictly limited to the above-stated obligations and it is therefore clearly agreed that The Manufacturer takes no responsibility for any damage to persons and/or property deriving from accidents of any nature that may occur during use of the Products, whether the warranty is confirmed or otherwise, also in cases of the choice of the Product configuration being recommended by The Manufacturer.

WARRANTY Procedure:

(a) The Customer shall fill in the COMPLAINT FORM and forward it to The Manufacturer along with other relevant information.

(b) The Manufacturer examines the COMPLAINT FORM and confirms or declines the warranty.

(c) The Manufacturer has the right to ask the Customer to send the malfunctioning product back to the Seller for further examination. In case the warranty is not confirmed the Product will be shipped back to the Customer at the Customer expense. If the warranty is confirmed, The Manufacturer shall compensate the shipment costs to the Customer within the limits of the best shipment quotation.

(d) In case the warranty is confirmed the Products shall be substituted at The Manufacturer's expense using ordinary shipment procedure. The express shipment can be used prior the agreement of the parties.

(e) In case the Product cannot be substituted The Manufacturer shall reimburse the value of the Product by issuing of Credit Note or in any other way agreed by the Parties.

IP69K

IP69k is a rating of German standard DIN 40050-9 extending the IEC 60529 that provides the maximum protection degree against close range high pressure (100 bar), high temperature (80°C) spray downs, applied at a variety of angles, as well as against dust penetration. **In many industries, where dust and dirt can be an issue or where hygiene and cleanliness are essential, like in food and beverage industry, this certification is indispensable for the equipment that must be sanitized, withstanding rigorous high pressure and high temperature wash-down procedures.**

Il codice IP indica il grado di protezione del prodotto contro l'intrusione di particelle solide e di liquidi. IP69K è il massimo grado di protezione: contro la penetrazione della polvere e dei getti d'acqua/vapore ad alta pressione (100 bar) ed alta temperatura (80°C), da angolazioni differenti.

In molte industrie dove la polvere e la sporcizia possono essere un problema oppure dove l'igiene e la pulizia sono essenziali, come nell'industria alimentare, questa certificazione è indispensabile per la sanitizzazione dell'apparecchiatura, in grado di sopportare le procedure di lavaggio ad alta pressione e temperatura.

NTT
NANOTECHNOLOGY
TREATMENT

NTT™ stands for a special treatment which results in modified external properties of the mechanical parts with complex geometry.

It is a highly technological process which benefits from the expertise in many industrial and scientific fields. An excellent resistance to corrosion and long durability are the main features of NTT™ finishing, which makes NTT™ treated products a first choice and unique solution for variety of applications in many industries.

NTT™ è uno speciale trattamento che come risultato ha la modifica delle proprietà superficiali delle parti meccaniche con geometria complessa. E' un processo altamente tecnologico che trae benefici dalle competenze in vari campi sia industriali che scientifici. Ottima resistenza alla corrosione e durabilità sono le caratteristiche principali della finitura NTT™ che fa del trattamento la soluzione unica e di prima scelta per la molteplicità delle applicazioni in numerosi settori industriali.

NSF
COMPONENT

NSF International is an accredited, independent third-party certification organization that tests and certifies products to verify they meet these public health and safety standards. The NSF certification mark on a product means that the product complies with all standard requirements referring to the hygienic and health. NSF conducts periodic unannounced inspections and product testing to verify that the product continues to comply with the standard.

NSF International è un'organizzazione indipendente accreditata di certificazione che testa e certifica i prodotti per verificare che essi garantiscano i requisiti delle norme di Salute e Sicurezza. Il marchio NSF su un prodotto significa che il prodotto stesso è conforme agli standard richiesti in riferimento alle norme di igiene e salute. NSF esegue controlli periodici non annunciati per verificare che il prodotto continui ad essere conforme agli standard delle norme.

CE

By applying CE mark a manufacture declares the conformity of the product to the safety requirements settled in European regulations. It means that the product is compliant to all the directives of European Community regarding its usage: from design and manufacturing to release to the market, functioning and recycling.

Mediante l'applicazione della marcatura CE al prodotto, si dichiara alle autorità che esso è conforme ai requisiti di sicurezza previsti dalle norme Europee.

La marcatura CE indica che il prodotto è conforme a tutte le disposizioni della Comunità Europea che prevedono il suo utilizzo: dalla progettazione, alla fabbricazione, all'immissione sul mercato, alla messa in servizio del prodotto fino allo smaltimento.
